COMPUTER ENGINEERING DEPARTMENT

STATEMENT OF PURPOSE

SUB: Business Communication & Ethics

COURSE: T.E.   **Year: 2020-2021**   **Semester: V**

DEPT: Computer Engineering

SUBJECT CODE: CSL505   **SUBMISSION DATE: 20/09/2020**

==

Name: Amey Thakur   **Roll No.:** 50

Class: TE COMPS B   **Submission Date:** 15/12/2020

Topic: STATEMENT OF PURPOSE

My first introduction to the technology of computers, I was quite fascinated and this fascination has developed a latent interest in knowing more and increasing my knowledge in this field. From the days of my school, I had developed this interest and I always updated myself to get accustomed to the latest tech-stack and literature in this field.

Finally, after my higher secondary examination, I was able to apply for a BE in Computer Engineering. This had to be done keeping in mind that I have to graduate in any field, so as to seek my higher goals.

I am expected to graduate from Mumbai University. During my four-year stay in college, I plan to never miss any opportunity of updating myself in the field of my interest. So far, I have learnt modules like Linux, AWS, Tableau, Processing concepts, Oracle SQL and I'm set to complete one more module of programming in 'Javascript' and a project undertaken in ML.

India is gearing to enter the twenty-first century as one of the highly developed and industrialized nation on the globe. The adoption of liberalization along with the phenomenon of globalization has triggered rapid industrial growth and the phenomenon of globalization has triggered rapid industrial growth and technological

upgradation. India is going to be one of the largest markets and booming industrial centre. This will create new opportunities especially in the field of computer technology. Hence, I wish to take the opportunity of securing an MS Degree in computer science and avail the opportunity of serving my country and people.

My aim of seeking admission in the US is to avail the advantages of securing the best of knowledge and the opportunity of the best academic facilities and environment. I am assured that your university has an excellent and strong foundation and the best of infrastructure that will bring the best out of me and help me achieve my goal of being a computer scientist. I hope that I am given this opportunity to fulfil my long-cherished dream.

Your kind consideration of my case will be highly acknowledged.
